Based on a course in the theory of statistics this text concentrates on what can be achieved using the likelihood/Fisherian method of taking account of uncertainty when studying a statistical problem. It takes the concept ot the likelihood as providing the best methods for unifying the demands of statistical modelling and the theory of inference. Every likelihood concept is illustrated by realistic examples, which are not compromised by computational problems. Examples range from a simile comparison of two accident rates, to complex studies that require generalised linear or semiparametric modelling.

The emphasis is that the likelihood is not simply a device to produce an estimate, but an important tool for modelling. The book generally takes an informal approach, where most important results are established using heuristic arguments and motivated with realistic examples. With the currently available computing power, examples are not contrived to allow a closed analytical solution, and the book can concentrate on the statistical aspects of the data modelling. In addition to classical likelihood theory, the book covers many modern topics such as generalized linear models and mixed models, non parametric smoothing, robustness, the EM algorithm and empirical likelihood.

From reader reviews:

Dora Vazquez:

Have you spare time for just a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the actual Mall. How about open or even read a book titled In All Likelihood: Statistical Modelling and Inference Using Likelihood? Maybe it is to become best activity for you. You understand beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have additional opinion?

Gregory Jones:

The book In All Likelihood: Statistical Modelling and Inference Using Likelihood give you a sense of feeling enjoy for your spare time. You can use to make your capable much more increase. Book can to get your best friend when you getting tension or having big problem using your subject. If you can make studying a book In All Likelihood: Statistical Modelling and Inference Using Likelihood to become your habit, you can get a lot more advantages, like add your personal capable, increase your knowledge about several or all subjects. You can know everything if you like available and read a book In All Likelihood: Statistical Modelling and Inference Using Likelihood. Kinds of book are several. It means that, science book or encyclopedia or other individuals. So , how do you think about this guide?

Olivia Dickert:

The book In All Likelihood: Statistical Modelling and Inference Using Likelihood can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a good thing like a book In All Likelihood: Statistical Modelling and Inference Using Likelihood? A number of you have a different opinion about reserve. But one aim that will book can give many information for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or data that you take for that, you are able to give for each other; you are able to share all of these. Book In All Likelihood: Statistical Modelling and Inference Using Likelihood has simple shape however, you know: it has great and large function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Jessica Palmer:

People live in this new day time of lifestyle always try to and must have the time or they will get lots of stress from both everyday life and work. So , if we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to you of course your answer can unlimited right. Then do you try this one, reading ebooks. It can be your alternative in spending your spare time, typically the book you have read is definitely In All Likelihood: Statistical Modelling and Inference Using Likelihood.
