James R Wait

Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) James R Wait

Long recognized as a classic in the field, this book offers comprehensive coverage of radio waves in stratified media. Well-known authority James R. Wait guides you through a broad range of physical problems using a wealth of experimental data that is particularly relevant to current studies of radiowave transmission in both terrestrial and extraterrestrial environments. *Electromagnetic Waves in Stratified Media* features a clear explanation of the Mode Theory of wave propagation, complete with supporting physical examples; a concise analysis of modes, rays, and their equivalencies; thorough coverage of asymptotic (high-frequency) developments; applications to telecommunications for frequencies from ELF to SHF (10 Hz to Gig Hz); and much more. It is a must-have book for every engineer in the field.

From reader reviews:

Jennifer Garrison:

Hey guys, do you would like to finds a new book to learn? May be the book with the concept Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) suitable to you? Often the book was written by well known writer in this era. The book untitled Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) is one of several books which everyone read now. That book was inspired many people in the world. When you read this guide you will enter the new dimensions that you ever know before. The author explained their thought in the simple way, so all of people can easily to recognise the core of this publication. This book will give you a large amount of information about this world now. To help you see the represented of the world in this book.

Lucille Grant:

Many people spending their period by playing outside with friends, fun activity along with family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It ok you can have the e-book, having everywhere you want in your Cell phone. Like Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) which is obtaining the e-book version. So , why not try out this book? Let's find.

John Collins:

This Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) is new way for you who has interest to look for some information because it relief your hunger of information. Getting deeper you upon it getting knowledge more you know or you who still having little digest in reading this Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) can be the light food for you because the information inside this specific book is easy to get by means of anyone. These books acquire itself in the form which is reachable by anyone, yep I mean in the e-book contact form. People who think that in e-book form make them feel sleepy even dizzy this publication is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book sort for your better life along with knowledge.

Bernetta Smith:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see

colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Electromagnetic waves in stratified media, (International series of monographs in electromagnetic waves) can make you sense more interested to read.
