Through historical and comparative research on the immigrant rights movements of the United States, France and the Netherlands, *Cities and Social Movements* examines how small resistances against restrictive immigration policies do – or don't – develop into large and sustained mobilizations.

- Presents a comprehensive, comparative analysis of immigrant rights politics in three countries over a period of five decades, providing vivid accounts of the processes through which immigrants activists challenged or confirmed the status quo
- Theorizes movements from the bottom-up, presenting an urban grassroots account in order to identify how movement networks emerge or fall apart
- Provides a unique contribution by examining how geography is implicated in the evolution of social movements, discovering how and why the networks constituting movements grow by tracing where they develop
- Demonstrates how efforts to enforce national borders trigger countless resistances and shows how some environments provide the relational opportunities to nurture these small resistances into sustained mobilizations
- Written to appeal to a broad audience of students, scholars, policy makers, and activists, without sacrificing theoretical rigor
