Is it possible to reconcile mathematics, philosophy, psychology, science, art, spirituality and religion? A few years ago this would have seemed impossible. However, in the years to come, this could become a reality. We are living in the midst of an uncertain, crucial and exciting period in human history. During the last few decades, science has undergone a radical transformation. The discovery of fractal geometry, holography, quantum and Chaos theory has completely altered our vision of the universe. Today, the universe appears to be more a dramatic, meaningful and purposeful work of art than an agglomeration of parts governed by deterministic laws. Many years ago, the philosopher, scientist and theologian Emanuel Swedenborg had already obtained a new paradigm of the universe that reconciles all aspects of human existence. In this book, the author demonstrates how the latest discoveries of mathematics, philosophy and science corroborate what Swedenborg already saw more than 200 years ago.
