Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users) David Benson

"PIC'n Up The Pace" is an intermediate level applications guide covering Microchip Technology's PIC Microcontrollers. Serial communication as a means of transferring data between PIC's and peripheral chips and also between two or more PIC's is described. Use of the 93C46 serial EEPROM is detailed as an example. Since we live in an analog world, A/D and D/A are discussed with several methods illustrated for each. Conditioning signals from sensors with an analog voltage output is described. Interfacing PIC controlled systems with humans requires some math, binary to decimal conversion and vice versa, alphanumeric LCD interfacing and scanning keypads. Single wire serial communication with a PIC-controlled LCD module which can be built by the reader is included. A digital thermometer example projects brings these topics together as an example. Finally, PIC16C84/PIC16F84 data EEPROM memory, program memory paging and locating tables in program memory are discussed.

"PIC'n Up The Pace" gives the reader the tools to design and build intermediate microcontroller-based instrumentation and systems.

From reader reviews:

Nancy Mitchell:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each reserve has different aim or maybe goal; it means that reserve has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they have because their hobby is definitely reading a book. Think about the person who don't like reading a book? Sometime, man feel need book once they found difficult problem as well as exercise. Well, probably you will need this Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users).

Molly Edwards:

This book untitled Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users) to be one of several books this best seller in this year, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this specific book in the book shop or you can order it by way of online. The publisher on this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Touch screen phone. So there is no reason for your requirements to past this guide from your list.

Carolyn Foley:

The reason? Because this Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such amazing way makes the content inside easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This book will give you a lot of benefits than the other book include such as help improving your skill and your critical thinking way. So , still want to hold off having that book? If I had been you I will go to the publication store hurriedly.

John Flores:

Beside this Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users) in your phone, it can give you a way to get closer to the new knowledge or facts. The information and the knowledge you might got here is fresh in the oven so don't possibly be worry if you feel like an outdated people live in narrow community. It is good thing to have Pick'n up the Pace -- Microcontroller Application Guide (for intermediate users) because this book offers to your account readable information. Do you oftentimes have book but you rarely get what it's all about. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book in addition to read it from currently!
