This expanded 2nd edition contains 70 additional pages, including 21 new case studies and a newly designed 16-page color section, with new treatment photographs. The new material focuses on sound layering techniques that integrate the use of high, middle, and low frequency tuning forks in the therapeutic environment.

History, science, mysticism, and healing are interwoven in this rich and instructive text. Reaching back to ancient views of the Universe and the Sumerian and Taos teachings, it explores the Great Theme and reunites us with a greater understanding of the Music of the Spheres.

This practical guide to healing with sound draws the connections between Eastern and Western science, medicine, mysticism, and music, and also provides specific treatment protocols, case studies, and detailed illustrations that demonstrate acupuncture, acupressure, and chakra and trigger points that are used in healing with the Acutonics Tuning Fork System.
