Jeremy Shere

**Renewable: The World-Changing Power of Alternative Energy** Jeremy Shere

*Where does the energy we use come from? It's absolutely vital to every single thing we do every day, but for most people, it is utterly invisible. Flick a switch and the lights go on. It might as well be magic.*

Science writer Jeremy Shere shows us in *Renewable: The World-Changing Power of Alternative Energy* that energy is anything but magical. Producing it in fossil fuel form is a dirty, expensive?but also hugely profitable? enterprise, with enormous but largely hidden costs to the entire planet. The cold, hard fact is that at some point we will have wrung the planet dry of easily accessible sources of fossil fuel. And when that time comes, humankind will have no choice but to turn?or, more accurately, return?to other, cleaner, renewable energy sources. What will those sources be? How far have we come to realizing the technologies that will make these sources available?

To find the answers, Shere began his journey with a tour of a traditional coal-fueled power plant in his home state of Indiana. He then continued on, traveling from coast to coast as he spoke to scientists, scholars and innovators. He immersed himself in the green energy world: visiting a solar farm at Denver's airport, attending the Wind Power Expo and a wind farm tour in Texas, investigating turbines deep in New York City's East River, and much more.

Arranged in five parts?Green Gas, Sun, Wind, Earth, and Water?*Renewable* tells the stories of the most interesting and promising types of renewable energy: namely, biofuel, solar, wind, geothermal, and hydropower. But unlike many books about alternative energy, *Renewable* is not obsessed with megawatts and tips for building home solar panels. Instead, Shere digs into the rich, surprisingly long histories of these technologies, bringing to life the pioneering scientists, inventors, and visionaries who blazed the way for solar, wind, hydro, and other forms of renewable power, and unearthing the curious involvement of great thinkers like Henry Ford, Thomas Edison, and Nicola Tesla.

We are at an important crossroads in the history of renewable technologies. The possibilities are endless and enticing, and it has become increasingly clear that renewable energy is the way of the future. In *Renewable*, Jeremy Shere's natural curiosity and serious research come together in an entertaining and informative guide to where renewable energy has been, where it is today, and where it's heading.

### **From reader reviews:**

#### **Audrey Rivas:**

The book untitled Renewable: The World-Changing Power of Alternative Energy contain a lot of information on this. The writer explains your ex idea with easy way. The language is very straightforward all the people, so do not really worry, you can easy to read this. The book was published by famous author. The author will bring you in the new age of literary works. You can easily read this book because you can read more your smart phone, or device, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site as well as order it. Have a nice study.

#### **Donna Salerno:**

In this time globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The actual book that recommended for your requirements is Renewable: The World-Changing Power of Alternative Energy this e-book consist a lot of the information on the condition of this world now. This kind of book was represented so why is the world has grown up. The dialect styles that writer use for explain it is easy to understand. The particular writer made some research when he makes this book. Here is why this book acceptable all of you.

#### **Daniel Scott:**

That reserve can make you to feel relax. This kind of book Renewable: The World-Changing Power of Alternative Energy was colourful and of course has pictures on there. As we know that book Renewable: The World-Changing Power of Alternative Energy has many kinds or variety. Start from kids until adolescents. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book tend to be make you bored, any it makes you feel happy, fun and rest. Try to choose the best book in your case and try to like reading in which.

#### **Larisa Nagle:**

Reading a publication make you to get more knowledge from that. You can take knowledge and information from your book. Book is composed or printed or created from each source this filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just in search of the Renewable: The World-Changing Power of Alternative Energy when you desired it?
