**Loose-leaf Version for CoreMicroeconomics (Budget Books)** Gerald Stone, Eric Chiang

## How does the CORE package work?

The **Core Text** is a traditional textbook focusing on the core topics in economics. It includes the usual textbook apparatus, including key terms and definitions. It also includes a set of innovative end-of-chapter questions and problems, many of which have been drawn from today's headlines and the business press.

The **CourseTutor** is designed for interactivity. Students must work through the CourseTutor with a pencil in hand, reading through tutorials, solving problems, and drawing graphs. Short quizzes help students assess their progress and suggest additional work to help them master concepts.

These two publications have been designed to work together for maximum reinforcement and practice. Since both are written by the same author the integration is seamless, providing a highly efficient study system.
