Surviving Cyberwar Richard Stiennon

Military and intelligence leaders agree that the next major war is not likely to be fought on the battleground but in cyber space. Richard Stiennon argues the era of cyber warfare has already begun. Recent cyber attacks on United States government departments and the Pentagon corroborate this claim. China has compromised email servers at the German Chancellery, Whitehall, and the Pentagon. In August 2008, Russia launched a cyber attack against Georgia that was commensurate with their invasion of South Ossetia. This was the first time that modern cyber attacks were used in conjunction with a physical attack.

Every day, thousands of attempts are made to hack into America's critical infrastructure. These attacks, if successful, could have devastating consequences. In Surviving Cyberwar, Stiennon introduces cyberwar, outlines an effective defense against cyber threats, and explains how to prepare for future attacks.

The book:

- begins with Shawn Carpenter and his discovery that China had hacked into his work place, Sandia Labs;
- follows the rise of cyber espionage on the part of the Chinese People's Liberation Army (PLA) as increasingly sophisticated and overt attacks are carried out against government and military networks around the world;
- moves from cyber espionage to cyberwar itself, revealing the rise of distributed denial of service (DDoS) as a means of attacking servers, websites, and countries;
- provides a historical perspective on technology and warfare is provided, drawing on lessons learned from Sun Tsu to Lawrence of Arabia to Winston Churchill; and
- finishes by considering how major democracies are preparing for cyberwar and predicts ways that a new era of cyber conflict is going to impact the Internet, privacy, and the way the world works.

This text is a stimulating and informative look at one of the gravest threats to Homeland Security today, offering new insights to technologists on the front lines, helping policy makers understand the challenges they face, and providing guidance for every organization to help reduce exposure to cyber threats. It is essential reading for anyone concerned with the current geopolitical state of affairs.

From reader reviews:

Todd Quesinberry:

As people who live in the particular modest era should be up-date about what going on or data even knowledge to make these people keep up with the era that is always change and move forward. Some of you maybe will update themselves by reading books. It is a good choice to suit your needs but the problems coming to a person is you don't know which one you should start with. This Surviving Cyberwar is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

William Gilbert:

Information is provisions for folks to get better life, information presently can get by anyone with everywhere. The information can be a knowledge or any news even a problem. What people must be consider while those information which is within the former life are challenging to be find than now could be taking seriously which one is suitable to believe or which one the resource are convinced. If you obtain the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Surviving Cyberwar as the daily resource information.

Alfred Leahy:

Exactly why? Because this Surviving Cyberwar is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will jolt you with the secret the idea inside. Reading this book alongside it was fantastic author who all write the book in such incredible way makes the content inside of easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This unique book will give you a lot of benefits than the other book include such as help improving your talent and your critical thinking method. So , still want to hesitate having that book? If I were you I will go to the book store hurriedly.

Francisco Garcia:

Beside this kind of Surviving Cyberwar in your phone, it might give you a way to get nearer to the new knowledge or details. The information and the knowledge you might got here is fresh from the oven so don't end up being worry if you feel like an aged people live in narrow small town. It is good thing to have Surviving Cyberwar because this book offers for your requirements readable information. Do you oftentimes have book but you rarely get what it's about. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss that? Find this book in addition to read it from right now!
