New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43)

New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43)

This timely collection of expository papers highlights progress and new directions in Hopf algebras. Arising from the MSRI workshop on Hopf Algebras in October 1999, some papers consider Hopf versions of classical topics, such as the Brauer group, while others are closer to recent work in quantum groups. In particular, there are articles on recent progress in classifying finite-dimensional Hopf algebras, both in the semisimple case and in the pointed case. The volume also includes an updated version of Mitsuhiro Takeuchi's article "A short course on quantum matrices", now a standard reference in spite of its relative lack of availability.

From reader reviews:

Debbie Brown:

Nowadays reading books are more than want or need but also work as a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book that improve your knowledge and information. The info you get based on what kind of e-book you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one with theme for entertaining for instance comic or novel. The New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43) is kind of book which is giving the reader erratic experience.

Carmen Fields:

Playing with family in the park, coming to see the marine world or hanging out with pals is thing that usually you could have done when you have spare time, in that case why you don't try thing that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43), you may enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh occur its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

Aaron Mullen:

New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43) can be one of your nice books that are good idea. We all recommend that straight away because this guide has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort to set every word into delight arrangement in writing New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43) although doesn't forget the main place, giving the reader the hottest as well as based confirm resource information that maybe you can be certainly one of it. This great information could draw you into new stage of crucial contemplating.

Kimberly Dyson:

Some individuals said that they feel bored when they reading a reserve. They are directly felt the item when they get a half regions of the book. You can choose typically the book New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43) to make your personal reading is interesting. Your current skill of reading ability is developing when you just like reading. Try to choose easy book to make you enjoy to study it and mingle the sensation about book and studying especially. It is to be initial opinion for you to like to open a book and read it. Beside that the reserve New Directions in Hopf Algebras (Mathematical Sciences Research Institute Publications, Vol. 43) can to be your new friend when

you're sense alone and confuse with the information must you're doing of that time.
