## Diagnosis and Management of Pulmonary Hypertension (Respiratory Medicine)

This book provides an overview of pulmonary hypertensive diseases, the current understanding of their pathobiology, and a contemporary approach to diagnosis and treatment. It discusses the definition and classification of these disorders and the epidemiology of pulmonary arterial hypertension (PAH); explores the approach to diagnosis and evaluation via methods such as echocardiography, right heart catheterization, and cardiopulmonary exercise testing; describes the major drug classes used to treat PAH and the cell signaling pathways that they target as well as adjunct and investigative therapies; and highlights special situations that are particularly challenging in the management of PAH. Written by experts in their respective fields, *Diagnosis and Management of Pulmonary Hypertension* is a valuable resource for pulmonologists, cardiologists, and practitioners in internal medicine and critical care.
