## Soil Insect Pests in Australia: Control Alternatives to Persistent Organochlorine Insecticides (Primary Industries Report Series) CSIRO

This report is directed at the following guidelines:

Identify the species concerned, their basic biology and ecology and the importance of each species (or related group of species) to particular agricultural/horticultural/pastoral industries in Australia

List control measures/management practices presently employed

Identify pest problems where organochlorines are still used or where no satisfactory control exists due to legislative action to remove organochlorines

Summarise recent and planned research seeking alternative control methods and the progress made or likely in the short-term in providing practical alternatives.

The report also reviews the distribution, identification, importance, basic biology and present control of and recent research on each soil-insect pest.
