Cognitive functioning in remitted bipolar patients: Comparison of cognitive function in first and multi-episode remitted bipolar patients Neha Sayeed, S.H. Nizamie

The present study attempts to examine the cognitive profile of patients having bipolar illness following their first episode and multiple episodes, currently in remission. This has to be compared and then further compared with normal control. So, this book would be helpful to the researchers and students to understand the nature of cognitive functions as per the single and multiple episode and for the management of bipolar patients.
