Shigeru Ban Philip Jodidio

Master innovator: Challenging accepted notions of architecture

From emergency relief shelters to a cardboard cathedral and exhibition spaces in shipping containers, Pritzker-prize winning architect **Shigeru Ban** has made his name with his **restlessly inventive response to material and situation**, as much as with his **humanitarian work** at the sites of natural and man-made disasters.

In the spirit of a **three-dimensional poetry**, Ban uses **materials as an incorporated part of his design**, selected not for their cutting-edge credentials but rather for their expressive ability, their capacity to convey the building's overall concept. In particular, Ban has made regular use of **paper tubing** in projects as varied as the Japanese Pavilion at Expo 2000 and emergency shelters for Rwanda's Byumba Refugee Camp.

This **essential introduction, compiled with Ban's own collaboration**, presents every one of his projects to date to survey the full reach and importance of, in the words of the Pritzker Prize jury, a "committed teacher who is not only a role model for younger generation, but also an inspiration."

About the series:

Each book in TASCHEN's Basic Architecture series features:

- an introduction to the life and work of the architect
- the major works in chronological order
- information about the clients, architectural preconditions as well as construction problems and resolutions
- a list of all the selected works and a map indicating the locations of the best and most famous buildings
- approximately 120 illustrations (photographs, sketches, drafts and plans)
