Biological Inquiry: A Workbook of Investigative Case Studies

Margaret A Waterman, Ethel B Stanley

Biological Inquiry: A Workbook of Investigative Case Studies Margaret A Waterman, Ethel B Stanley

This new workbook offers eight investigative case studies, one for each unit of the book. Each case study requires students to synthesize information from one unit of the text and apply that knowledge to a real-world scenario as they evaluate new information, analyze evidence, plot data, or seek explanations. For example, a case study on the West Nile virus for the genetics unit requires students to apply their understanding of protein synthesis, viral genomes, and transmission pathways.
