Contributions to the Theory of Zeta-Functions:The Modular Relation Supremacy (Series on Number Theory and Its Applications) Shigeru Kanemitsu, Haruo Tsukada

This volume provides a systematic survey of almost all the equivalent assertions to the functional equations — zeta symmetry — which zeta-functions satisfy, thus streamlining previously published results on zeta-functions. The equivalent relations are given in the form of modular relations in Fox H -function series, which at present include all that have been considered as candidates for ingredients of a series. The results are presented in a clear and simple manner for readers to readily apply without much knowledge of zeta-functions.

This volume aims to keep a record of the 150-year-old heritage starting from Riemann on zeta-functions, which are ubiquitous in all mathematical sciences, wherever there is a notion of the norm. It provides almost all possible equivalent relations to the zeta-functions without requiring a reader's deep knowledge on their definitions. This can be an ideal reference book for those studying zeta-functions.

From reader reviews:

Lorraine Prinz:

Here thing why this particular Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications) are different and trustworthy to be yours. First of all examining a book is good but it really depends in the content of it which is the content is as scrumptious as food or not. Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications) giving you information deeper as different ways, you can find any guide out there but there is no guide that similar with Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications). It gives you thrill looking at journey, its open up your personal eyes about the thing that happened in the world which is might be can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your way home by train. If you are having difficulties in bringing the branded book maybe the form of Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications) in e-book can be your alternative.

Benjamin Munk:

Reading a book can be one of a lot of activity that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new data. When you read a publication you will get new information because book is one of many ways to share the information as well as their idea. Second, studying a book will make a person more imaginative. When you studying a book especially hype book the author will bring you to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications), you may tells your family, friends along with soon about yours reserve. Your knowledge can inspire different ones, make them reading a e-book.

Joy Rodriguez:

Playing with family in the park, coming to see the coastal world or hanging out with friends is thing that usually you will have done when you have spare time, subsequently why you don't try thing that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications), you may enjoy both. It is great combination right, you still want to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't have it, oh come on its identified as reading friends.

Todd Apperson:

Would you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't judge book by its handle may doesn't work is difficult job because you are scared that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer is usually Contributions to the Theory of Zeta-Functions: The Modular Relation Supremacy (Series on Number Theory and Its Applications) why because the wonderful cover that make you consider with regards to the content will not disappoint you actually. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.
