Discover the technology for the next generation of radar systems

Here is the first book that brings together the key concepts essential for the application of Knowledge Based Systems (KBS) to radar detection, tracking, classification, and scheduling. The book highlights the latest advances in both KBS and radar signal and data processing, presenting a range of perspectives and innovative results that have set the stage for the next generation of adaptive radar systems.

The book begins with a chapter introducing the concept of Knowledge Based (KB) radar. The remaining nine chapters focus on current developments and recent applications of KB concepts to specific radar functions. Among the key topics explored are:

- Fundamentals of relevant KB techniques
- KB solutions as they apply to the general radar problem
- KBS applications for the constant false-alarm rate processor
- KB control for space-time adaptive processing
- KB techniques applied to existing radar systems
- Integrated end-to-end radar signals
- Data processing with overarching KB control

All chapters are self-contained, enabling readers to focus on those topics of greatest interest. Each one begins with introductory remarks, moves on to detailed discussions and analysis, and ends with a list of references. Throughout the presentation, the authors offer examples of how KBS works and how it can dramatically improve radar performance and capability. Moreover, the authors forecast the impact of KB technology on future systems, including important civilian, military, and homeland defense applications.

With chapters contributed by leading international researchers and pioneers in the field, this text is recommended for both students and professionals in radar and sonar detection, tracking, and classification and radar resource management.

### **From reader reviews:**

#### **Kathryn Cannon:**

Now a day folks who Living in the era exactly where everything reachable by connect with the internet and the resources inside can be true or not demand people to be aware of each info they get. How people have to be smart in getting any information nowadays? Of course the correct answer is reading a book. Reading a book can help persons out of this uncertainty Information specially this Knowledge Based Radar Detection, Tracking and Classification book since this book offers you rich information and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it you may already know.

#### **Beth Stewart:**

Information is provisions for folks to get better life, information these days can get by anyone from everywhere. The information can be a understanding or any news even a problem. What people must be consider if those information which is inside former life are challenging to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you get the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Knowledge Based Radar Detection, Tracking and Classification as your daily resource information.

#### **Ruben Jenkins:**

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity that is look different you can read a book. It is really fun for yourself. If you enjoy the book that you simply read you can spent 24 hours a day to reading a publication. The book Knowledge Based Radar Detection, Tracking and Classification it is quite good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. When you did not have enough space bringing this book you can buy the particular e-book. You can m0ore effortlessly to read this book from your smart phone. The price is not to fund but this book offers high quality.

#### **Antonio Ritchie:**

People live in this new day of lifestyle always try and and must have the free time or they will get great deal of stress from both everyday life and work. So , when we ask do people have extra time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity are there when the spare time coming to you actually of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative inside spending your spare time, the particular book you have read is Knowledge Based Radar Detection, Tracking and Classification.
