**Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library)** Vladislav Shevchenko, Zhanna Rodionova, Gregory Michael

This book is the first to document in depth the history of lunar and planetary cartography in Russia. The first map of the far side of the Moon was made with the participation of Lomonosov Moscow University (Sternberg Astronomical Institute, MSU) in 1960. The developed mapping technologies were then used in preparing the “Complete Map of the Moon” in 1967 as well as other maps and globes. Over the years, various maps of Mars have emerged from the special course “Mapping of extraterrestrial objects” in the MSU Geography Department, including the hypsometric map of Mars at a scale of 1:26,000,000, compiled by J.A. Ilyukhina and published in 2004 in an edition of 5,000 copies. A more detailed version of this map has since been produced with a new hypsometric scale. In addition, maps of the northern and southern hemispheres of Mars have been compiled for the hypsometric globe of Mars. Relief maps of Venus were made in 2008, 2010, and 2011, and hypsometric maps of Phobos and Deimos at a scale of 1:60,000 were published in 2011. History of Lunar and Planetary Cartography in Russia provides detailed information on the compilation of this diverse range of maps and will be of interest to all lunar and planetary cartographers.

### **From reader reviews:**

#### **David Waymire:**

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim or perhaps goal; it means that reserve has different type. Some people experience enjoy to spend their the perfect time to read a book. These are reading whatever they take because their hobby is reading a book. Consider the person who don't like looking at a book? Sometime, man feel need book when they found difficult problem as well as exercise. Well, probably you'll have this Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library).

#### **Arthur Freeman:**

Book is definitely written, printed, or created for everything. You can know everything you want by a e-book. Book has a different type. As it is known to us that book is important point to bring us around the world. Alongside that you can your reading proficiency was fluently. A publication Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) will make you to possibly be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think in which open or reading some sort of book make you bored. It is far from make you fun. Why they might be thought like that? Have you looking for best book or suited book with you?

#### **Doug Campbell:**

This Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is usually information inside this book incredible fresh, you will get information which is getting deeper you actually read a lot of information you will get. That Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) without we know teach the one who examining it become critical in contemplating and analyzing. Don't end up being worry Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) can bring whenever you are and not make your bag space or bookshelves' come to be full because you can have it within your lovely laptop even phone. This Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) having great arrangement in word as well as layout, so you will not experience uninterested in reading.

#### **Thomas Rojas:**

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book ended up being rare? Why so many question for the book? But any kind of people feel that they enjoy for reading. Some people likes reading, not only science book but novel and Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) or perhaps others sources were given expertise for you. After you know how the truly great a book, you feel need to read more and more. Science e-book was created for

teacher as well as students especially. Those books are helping them to add their knowledge. In various other case, beside science e-book, any other book likes Lunar and Planetary Cartography in Russia (Astrophysics and Space Science Library) to make your spare time a lot more colorful. Many types of book like here.
